

freeduc-CD

<http://ofset.org/freeduc-cd>

Dozens of free-libre educational programs

Usable in the school, usable at home, usable on every computer

Use it with removable memories: you find the same environment everywhere

Ver. 1.4 - Nov. 2003

Wherever we go, whenever we want, Freeduc-CD brings most powerful applications for writing, drawing, calculations, etc. Included are: monolingual and bilingual dictionaries, a geographic world database, an editor for structured documents linked with state-of-the-art algebra systems, a viewer for biomolecules, a dynamic geometry application, the OpenOffice.org suite, the Gimp, etc.

Try it, use it on any computer: no damage, no footmark. Install it on your computer: it is a brand-new Debian system, set up and working instantly with no hassle.

No non-free components. Enjoy it, trust it, share it widely.
